SPECIFICATIONS

Application

- Closed Cell Foam Tape is a pressure-sensitive adhesive liner that has been tested for use in a range of fire-resistant glazing systems and fire door assemblies.
- Excellent strength and flexibility is a key

feature however, it is also easy to cut or trim the tape with scissors or a sharp knife to allow for straightforward and precise installation.

- An extra highlight of the tape is its good resistance to oxygen, weather and fungi.
- 30% compression assures a weather-tight seal.
- No drying or curing time is required, allowing for quick installation.
- Tested with a wide range of glass types from many of the main manufacturers.
- Designed to apply directly to the surface without specialist primers or sealers.
- Instant adhesion without contamination of other surfaces.
- Developed to achieve successful fire performance to both BS and EN Standards.

Material

- Closed Cell Foam Tape is a medium density, closed cell PE foam that is supplied in a roll with a single sided adhesive for straightforward installation.

Standard Sizes

- 10mm x 3mm x 500m
- 10mm x 6mm x 250m
- 12mm x 5mm x 250m
- 15mm x 4mm x 15m
- 10mm x 2mm x 33m
- Other sizes available upon request

Certification & Testing

Referenced in the following Certifire Certification*: CF377, CF5308, CF5304, CF5305, CF5306, CF137 and CF581.

*Please refer to glass manufacturer data for scope in application.
